ALMA MATER LABS

Your Learning Campus!

Read for aspiring candidates

NOT VIBING WITH SCHOOL?

Are you between 14 and 18 years of age? Or a someone with design and basic coding skills? Totally get it!

Ready to dive into what truly excites you? Let's chat. Our focus is to help someone like you if you have an interest in any area relating to computers, technology or design

Is this you?

- What gets you pumped in life?
- Your deeper interests—what fires you up?
- Ever wondered what's behind that face of yours?
- What sets off that lightbulb in your mind and why?
- How do you want to make a difference in society
- Where do you see yourself rocking it in the next 3 years?
- Skills you're itching to master and why?
- Making the bucks : how do you see yourself growing?

At Alma Mater Labs, we run the Propulsion & Alpha program. We are all about unlocking your potential

We're here to help you connect with enthusiasts who share your passions or exponents of a similar skill. Join us on an experience-packed journey. We're not just about creating future leaders; we're all about laying down that solid groundwork while you set an epic example.

Think of Alma Mater Labs as your next-level Alma Mater! Ready to launch your path? Reach out on almamater@shaananportfolio.com or call us at: (+597) 8197439/8960703 to have a chat.

You can also request a call with your legal guardians and we would love to have a chat.

Are you worried about your child's future?

We also look at the interest level of your child in terms of hobbies or passion and we attempt to propel that forward. Beside we spend time on understanding and enhancing their sociocultural intelligence.

No Need to Worry!

Are you concerned about your child, son, daughter because they cannot focus on school and or have diverse interest? We are a team of developers, software coders, marketing professionals, trainers and we have initiated the Alma Mater Labs with our Propulsion & Alpha program, as the program for your son or daughter to develop their skills around various skillsets

Each program is custom build to each child and may not be the same. We would normally admit in 1 – 4 candidates in one group only. These are apex level practical programs and very immersive for each apprentice.

Reach out on almamater@shaananportfolio.com with the Subject line saying : More Info or call us at: (+597) 8197439/8960703 for an appointment

Read for parents

We're here to assist, connecting your child to exponents who share your child's interests. Let us embark on a journey filled with enriching experiences. Our focus goes beyond shaping future leaders; we are dedicated to establishing a strong foundation while you set an impressive example.

Alma Mater Labs allows your child to actualize their learning and explore their personality

PROPULSION PROGRAM
1 year

Our goal is to stimulate development and thinking capacity and improve consciousness. Hence we work on Skilling, Interest Path and Social Development Path. Our interest path is built around how to engage in one key area of interest of the apprentice. We dont stop there. We also look at the apprentice's social impulses and we try to understand him/her better in terms of social intelligence

WE ARE NOT A SCHOOL. WE ARE NOT HAVING A CIRRICULUM. WE HAVE A PATH. GOAL STAYS THE SAME. BUT THE PATH CAN BE CHANGED

We have this skill path for year 1 of Applied Computing but this is a dynamic program and hence as we progress we may make amendments/appendments/editions to the program based on our assessment and need of the learning apprentice.
This flexibility allows to custom tune the learning objectives we have and key learning areas. Our mission is to make learning as practical and fun as possible.

1. Computer basics and terminologies
2. Understanding Computer Hardware
3. Understanding networking
4. Understanding Computer Software
5. Design Thinking in problem solving
6. What is Ui and Ux
7. Understanding Ui and Ux and Wireframing
8. Applied used cases of UI/UX and Wireframing

Swahili saying: If you want to go far go together, if you want to go fast go alone.

The Alpha Program is aimed at more advance learners who either want to take a professional route to graphic design or software design and development through experimenting and discussion boards.

The candidates must have some **knowledge** of photoshop or css+html+javascript but we also entertain candidates with zero experience but have the IQ to pivot to such learning and career streams.

Age limit for this is 18 years and above. The sessions are run for 4 hours 5 days a week, for 6 consecutive months, for candidates with some **knowlegde** as mentioned above. For those with no hands-on knowledge on photoshop or css+html+javascript, the session is 1.5 hours for 24 months followed by 1 year internship. Candidates must have their own laptop.

For information on this program and to know about the fees send us an email to almamater@shaananportfolio.com with subject line of the email stating: Alpha Program or call us on: (+597) 8197439/8960703 for an appointment
